

We listen to K-Love here in Bangor Maine on a translator and love it. We are served by their music, their great updates on current events and their insights into the things going on that are happening to serve our communities. They have many opportunities for our family to help serve our community through helping the homeless, the underprivileged and information that is important to our communities situations. We really hope that any decisions by the FCC would not take our K-Love station away from Bangor Maine...we listen primarily to K-Love and would be lacking for a replacement if it were to be taken away by digital FM....thanks for your consideration in leaving K-Love on the air....Sincerely the McLeod Family of 9
